• ABOUT US •

The World Silver Council is a market development organisation for the silver industry. Working within the investment, jewellery and technology sectors as well as engaging in government affairs, its purpose is to provide industry leadership whilst stimulating and sustaining demand for silver. With our unique insight into the global silver market, we see unrealised potential for silver across society. With world-class organisations, we intervene to create new possibilities and work to ensure silver mining is responsibly undertaken, with measurable economic benefit globally.

Based in India, the World Silver Council is an organization whose members comprise the country's leading silver miners, dealers, bullion dealers and silver jewellery retailers and manufacturers.

The world of silver is dynamic. Its uses are widely-varied, and its desirability is resilient and enduring. Silver helps combat infections and is an essential element in bacterial control medicinally. It protects the wealth of individuals and nations alongside gold. It is a precious metal considered important for future revolutions in science and carries memories across generations and cultures.

Domestic customers at Titan less interested in buying LGDs than their US counterparts: Titan MD

Domestic customers at Titan Company are less interested in buying synthetic diamonds than their US and overseas counterparts, looking more for assurances that the stones they purchase are natural.

“We’ve been trying to track the inquiries on a continuous basis across all the stores, Tanishq, CaratLane, Mia and Zoya, and so far we have not seen material inquiries for [customers wanting lab-grown diamonds],” Titan managing director C.K. Venkataraman said. “What we do hear about, what our customers are more curious about, they want to be assured that what we are selling is natural, and [doesn’t have any lab-grown in it].”

Venkataraman noted that some customers have started to demand proof that the company’s diamonds are natural. Any stones entering the company, which are primarily sourced via De Beers sightholders, are subject to very stringent tests. The jeweler has invested “extensively” in equipment for its labs and across all its partners to ensure its supply is natural. Diamonds are tested three to four times before being sold, he explained.
